

Antarctica and Chilean Fjords of Patagonia

This is a truly diverse expedition, with highlights that include spending five days in Antarctica before venturing into the Chilean fjords, discovering the rich wildlife of Patagonia and visiting one of the most scenic national parks in the world. Enjoy spending time ashore, kayaking, hiking and close encounters with penguins, birds and seals.

19 days/18 nights

ITINERARY

Day 1: Santiago, Chile

The capital of Chile is exciting and diverse. There is a lot to discover here, from the Andean glaciers at the city borders, tall mountains and skyscrapers to quiet parks, colonial architecture, bohemian quarters and the fast-flowing Mapacho River. Your adventure starts with an overnight hotel stay here.

Day 2: Santiago - Punta Arenas, Chile

You fly early in the morning to Punta Arenas where MS Roald Amundsen is ready for this expedition to Antarctica.

This is an expedition where the elements rule, and the weather, wind and ice conditions will determine our final schedule. Safety is paramount and the captain will decide the sailing itinerary during the voyage. Therefore, this itinerary is just an indication of what you can experience, and why every expedition with Hurtigruten is unique.

Brand new in 2019, the MS Roald Amundsen is a state of the art vessel and features new and environmentally sustainable hybrid technology that will reduce fuel consumption and CO2 emissions by 20%, showing the world that hybrid propulsion on large ships is possible. Named after the first man to cross Antarctica and reach the South Pole, MS Roald Amundsen leads the way towards an even more sustainable way of travelling. The ship is specially constructed for voyages in polar waters. It serves as a comfortable base camp at sea – bringing adventurers from all over the world to the most spectacular destinations in the most sustainable way.

Day 3 & 4: At sea

We sail through the Beagle Channel, named after the ship that carried Charles Darwin on his voyage of discovery – HMS Beagle. Then we continue over the Drake Passage, where two oceans meet, on our way to Antarctica.

This sea passage was notorious among the early polar explorers and is a unique voyage which few have the chance to experience. The Drake Passage connects the southern Atlantic and Pacific oceans. Here the warm water from the north meets the cold, less salty water from the south.

This makes the waters here particularly rich in nutrients and forms the foundational basis of the areas' unique marine life. On the way through the straits you can learn a great deal about Antarctica's fantastic wildlife and history.

Our Expedition team will start the lecture programme to prepare you for the experiences ahead. There will also be various workshops and presentations. Make sure to spend some time on deck to enjoy the fresh sea air and look out

for wildlife. Familiarize yourself with our newest and most innovative expedition vessel and take advantage of all the facilities on board.

Day 5-8: Antarctica

Antarctica is isolated from the rest of the world by ocean currents. Ninety per cent of the world's ice is here, 4000 metres thick, covering the landmass. In winter it is further cut off by the sea ice forming off the coast – virtually doubling the size of the continent. In summer, it is a breeding ground for millions of penguins, whales and seals who, for the rest of the year, simply spend their time at sea. Most wildlife here thrive on the cornerstone species of krill. The krill population in the Southern Ocean represents the largest biomass of one species on Earth.

As outlined in the Antarctic Treaty, this is a continent dedicated to peace, science and tourism. No human activity is allowed to alter the perfect natural balance. We are visiting a place that has evolved through millennia without human interference. Therefore, we adhere to very strict environmental guidelines and rules. We want to leave nothing but footprints and take nothing but pictures!

Every voyage to this continent is an expedition. Even the most sophisticated technology cannot override some of the climatic challenges that are a part of this environment. Therefore, we need to be pragmatic; we change landings, re-route and shift plans as we go along. This also means that we will take advantage of the often-ideal conditions to spend hours ashore, on the water with kayaks, hiking or simply cruising amongst huge pods of whales. Weather, wind and ice conditions have a great influence on our programme and schedule.

We will attempt to land several places, including Deception Island, Half Moon Island, Brown Bluff, Cuverville Island and Neko Harbour. All of these places are serene and offer untouched nature, penguin colonies, seals, whales in the ocean, glaciers, icebergs in every shape and colour, old whaling stations and research bases. It's hard to sum up all the impressions you will gain. As a well-known quote from a veteran Antarctic traveler put it: *"If you can describe Antarctica with words, you have probably never been there."*

Day 9-10: At seas

After four unforgettable days in Antarctica, MS Roald Amundsen takes us safely back across the famous Drake Passage. The voyage from the Antarctic Peninsula to the southern tip of Argentina is roughly 950 km (600 mi) or 40 hours sailing time in good weather. During the voyage north, we will continue our lecture series and recap our experiences of Antarctica. As we reach the southernmost tip of South America, we will land on Cape Horn if the conditions allow it. Going ashore can be very difficult because of the sometimes-extreme weather in this area.

This is the southernmost point of Chile and lies almost 56 degrees south, marking the boundary between the Atlantic and Pacific Oceans and the northern end of the Drake Passage. The region is of great significance on account of its location, history, discoveries and trade routes. If we are able to anchor off Cape Horn, you will be able to go ashore to explore this deserted and yet romantic piece of land at the end of the world.

Day 11: Chilean fjords

The Chilean fjords' deep channels, fjords and mountains plunging into the icy water always leave a profound impression on visitors. This wild and remote area seems almost untouched by humans. The glacial ice has scoured its way between the mountains, creating the isolated islands and hidden bays that form the unique fjord landscape of Chile. Snow-capped mountains and steep valleys make a striking contrast to a lush coastline that is rich in wildlife. You might be lucky enough to spot sea lions, Andean condors and several bird species that can only be found here.

Day 12-13: Puerto Natales

Puerto Natales is the gateway to the world-renowned Torres del Paine National Park, one of the most attractive nature sanctuaries in the world. Its main feature is the "towers" themselves; impressive rock formations, called "Torres del Paine" (Towers of Paine). The formations are made up of the Torre Central (9,186 feet high), Torre Sur (9,350 feet) and Torre Norte (7,375 feet).

The park features azure lakes, trails that meander through emerald forests, roaring rivers, (which you'll cross on rickety bridges) and one big, radiant blue glacier. Torres del Paine hosts stunning variety, from the vast open steppe to rugged mountain terrain topped by looming peaks. This diversity of environments hosts a wide variety of a fauna and flora. While we are here you might see llamas, pumas, chilla foxes and skunks in addition to more than 100 species of birds like the Andean condor and black-chested buzzard eagle. Enjoy hiking in these amazing surroundings.

Day 14: Puerto Eden

After an unforgettable cruise through Patagonian waters, the unique village of Puerto Edén will enchant you. It is a tiny settlement in Bernardo O'Higgins National Park, situated at the end of a deep fjord and surrounded by mountains. Its population of 250 includes the 15 remaining members of the Kawéskar people. Puerto Edén is a great place to experience the traditional indigenous culture of Patagonian tribes.

The villagers sell fish, mussels and shellfish products, which are taken to markets by a weekly transport boat. For

souvenirs, buy traditional Kawéskar crafts such as wicker baskets and boats made from sea lion skins and tree bark. Enjoy a stroll among the laneways, and maybe you will spot one of the many Magellan hummingbirds found here when you join the Expedition team for hiking or kayaking.

Day 15: At sea

The expedition continues north through the fabled waters of Patagonia. As we sail through iconic Andean seascapes, you have plenty of time to gaze out on the magnificent natural expanse.

Day 16: Castro

Located on Isla Grande de Chiloé, Castro is set among windswept hills and green vegetation. The city is known for its colourful “palafitos”, wooden houses mounted on stilts along the water’s edge. Come ashore and enjoy the local Chilote character and curious energy, mixed with a dash of modern development. The Iglesia San Francisco is a UNESCO World Heritage Site. The church is a visual delight: bright yellow and orange with a lavender trim. The varnished-wood interior is stunning, illuminated by rows of stained-glass windows. Other sights include Plazuela del Tren, a small plaza right by the waterfront with an odd collection of old trains.

A stroll in the Cementerio Parroquial is fascinating, as some of the tombs are quite grand and ornately decorated. Feria Campesina Yumbel is a bustling fruit and vegetable market. There are also household goods and fish stalls here. In the shop Feria Artesanal Lillo, located just south of the port, you can buy excellent hand-knit woollen goods and handicrafts. Most of the restaurants and cafes in Castro are concentrated along the Calle Blanco, running from the southern end of the plaza down to the waterfront, and this is where you can get a taste of the renowned meat, potato and seafood stew. Close to the town is Chiloé National Park, a largely unexplored wilderness hosting rare flora and fauna. The park features wide deserted beaches and long stretches of rugged coastline, and is home to dozens of seabird species, penguins and sea lions.

Day 17-18: At sea

As we make our way along the Pacific coast to Valparaíso, we will have a recap of everything we have experienced on this expedition. Make sure you spend some time on deck looking for wildlife.

Day 19: Valparaíso, Chile

Sadly, every expedition must come to an end. And this expedition ends in the colourful and poetic city of Valparaíso. Maybe you have some time to explore this scenic town before you fly home. We can arrange for accommodation here to extend your stay.

A similar cruise operates southbound from Valparaíso on October 19, 2020. Please ask us for details on the itinerary and prices for this expedition.

Optional touring add-ons:

Optional Cruise Excursions:

- Castro – Castro and its Churches, 3 1/2 hours
- Castro – Trek at Chiloé National Park, 6 3/4 hours
- Puerto Natales – Scenes of Puerto Natales, 3 hours
- Puerto Natales – Torres del Paine National Park, 9 hours

Suggested Pre and Post-Cruise Optional Add-On Programs:

- The Best of Santiago, 4 hours
- Santiago – Chilean Folk Show & Dinner, 4 hours
- Santiago – Vineyard Visit with Wine Tasting, 4 hours
- Santiago and Valparaíso, pre and post-cruise program, 2 days
- Santiago – Atacama Desert, 6 days
- Chilean Patagonia, pre-cruise, 4 days

We can provide you with full details and prices of these and other optional programs to enhance your expedition cruise experience.

Details

Trip Code:

009590-R14

INCLUDED

- One night of accommodation in Santiago pre-cruise
- Transfer hotel to airport, Santiago
- Economy flight one-way Santiago to Punta Arenas

- Transfer airport to ship in Punta Arenas, including city tour and boxed lunch
- Accommodation on board the ship, in cabin category booked
- Full board basis, including tea and coffee
- Wind and water-resistant jacket
- Landings with small boats, activities on shore and aboard the ship
- English-speaking Expedition Team for guiding landings, activities and educational lectures

NOT INCLUDED

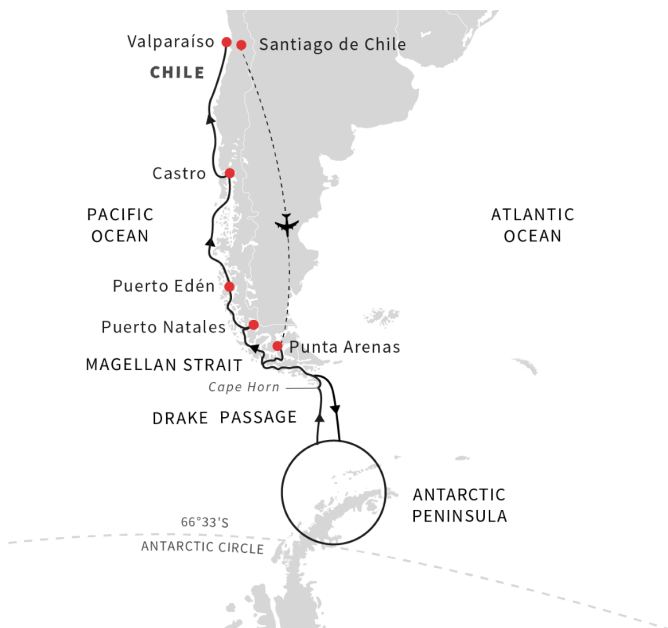

- International airfare to/from Chile
- Gratuities to staff and crew
- Soft drink and alcoholic beverages
- Post-cruise hotel accommodation in Valparaiso
- Visa & passport fees, vaccinations as required
- Items of a personal nature
- Travel insurance (including medical evacuation) - mandatory

TOUR NOTES

Similar cruise programs are offered in 2022 and 2023, In-Depth Antarctica and Patagonia, from 18 to 22 days duration. We can provide you with details of these programs including itineraries, dates and pricing.
